

## PAGLIERINO TRAVERTINE

Transform your living space with the natural beauty of Paglierino Travertine, a natural stone quarried in Italy. This stunning stone features a light, creamy beige colour and unique patterns, making it a popular choice among homeowners, architects, and designers.

Paglierino Travertine is a versatile material that can be used for various design projects, including wall and floor applications, benchtops, mosaics, pool and wall capping, stairs, and other indoor and outdoor applications. Its durability and resistance to weathering make it an ideal choice for exterior projects as well.

This natural stone is available in a range of finishes, including honed, vein cut, cross cut, filled and polished vein cut, honed vein cut, and honed cross cut finishes. The honed finish provides a smooth, matte look for a modern and sophisticated feel, while the polished finish creates a shiny, reflective surface that enhances the stone's natural colours and patterns.

The vein cut finish creates a linear pattern that is perfect for contemporary designs, achieved by cutting the stone parallel to its natural layers. The cross cut finish creates a more organic and natural pattern, achieved by cutting the stone perpendicular to its natural layers, perfect for traditional and rustic designs.

Paglierino Travertine's neutral colour and subtle patterns make it a versatile choice that can compliment any design style, from modern to traditional. This natural stone is not only beautiful but also easy to maintain, making it the perfect choice for your next design project.

### Applications:
